

AWS IAM USERS:

The screenshot shows the AWS IAM Dashboard. On the left is a navigation menu with sections: Identity and Access Management (IAM), Access Management, Access reports, and Account and organization. The main content area is titled 'IAM Dashboard' and includes a table of IAM resources, a 'What's new' section with updates, and three informational boxes on the right: AWS Account, Tools, and Additional information.

IAM resources				
Resources in this AWS Account

S3 Bucket for user-1:

The screenshot shows the AWS S3 console for a bucket named 'samplebucket--7654f3a0'. The top navigation bar includes the AWS logo, search bar, and account information (United States (N. Virginia), Account ID: 3814-9209-3547, user-1). The left navigation menu has sections: Buckets, Files, Access management and security, Storage management and insights, and Account and organization. The main content area shows the bucket's 'Objects' tab, which is currently empty.

samplebucket--7654f3a0

Objects (0)
Objects are the fundamental entities stored in Amazon S3. You can use [Amazon S3 inventory](#) to get a list of all objects in your bucket. For others to access your objects, you'll need to explicitly grant them permissions. [Learn more](#)

Find objects by prefix

Name	Type	Last modified	Size	Storage class
No objects You don't have any objects in this bucket.

EC2 Instance for user-1:

The screenshot shows the AWS Management Console for user-1. The main content area displays the 'Instances' page. A red error message is visible, stating: 'You are not authorized to perform this operation. User: arn:aws:iam::381492093547:user/spl66/user-1 is not authorized to perform: ec2:DescribeInstances because no identity-based policy allows the ec2:DescribeInstances action'. The error message includes a 'Retry' button and a 'Diagnose with Amazon Q' button. The left sidebar shows the navigation menu with options like Dashboard, AWS Global View, Events, Instances, Instance Types, Launch Templates, Spot Requests, Savings Plans, Reserved Instances, Dedicated Hosts, Capacity Reservations, Capacity Manager, Images, AMIs, AMI Catalog, Elastic Block Store, and Volumes.

Stopping EC2 Instance for user-2:

The screenshot shows the AWS Management Console for user-2. The main content area displays the 'Instances' page. A red error message is visible, stating: 'Failed to stop the instance i-00cd07626cf21434f'. The error message includes a 'Diagnose with Amazon Q' button. The left sidebar shows the navigation menu with options like Dashboard, AWS Global View, Events, Instances, Instance Types, Launch Templates, Spot Requests, Savings Plans, Reserved Instances, Dedicated Hosts, Capacity Reservations, Capacity Manager, Images, AMIs, AMI Catalog, Elastic Block Store, and Volumes. The instance details for 'i-00cd07626cf21434f (LabHost)' are shown, including its Public IPv4 address (98.89.1.201), Private IPv4 addresses (10.1.11.172), and Public DNS (ec2-98-89-1-201.compute-1.amazonaws.com).

S3 Bucket for user 2:
