

INTELLIGENCE REPORTING AND DISSEMINATION

EXERCISE 1: Threat Intelligence Reporting

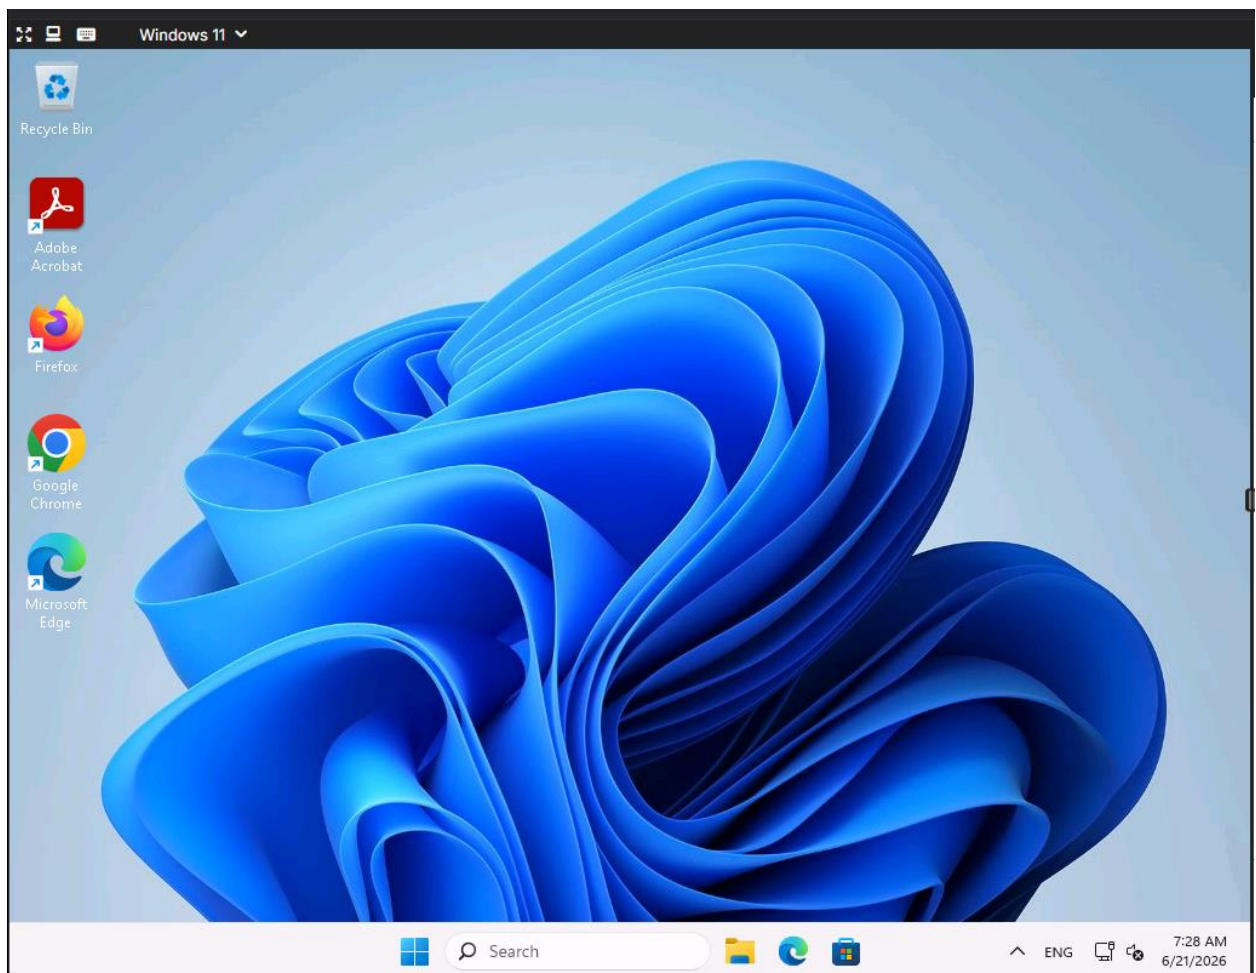

Lab Objectives

The objectives of this lab are to help you understand how to do the following:

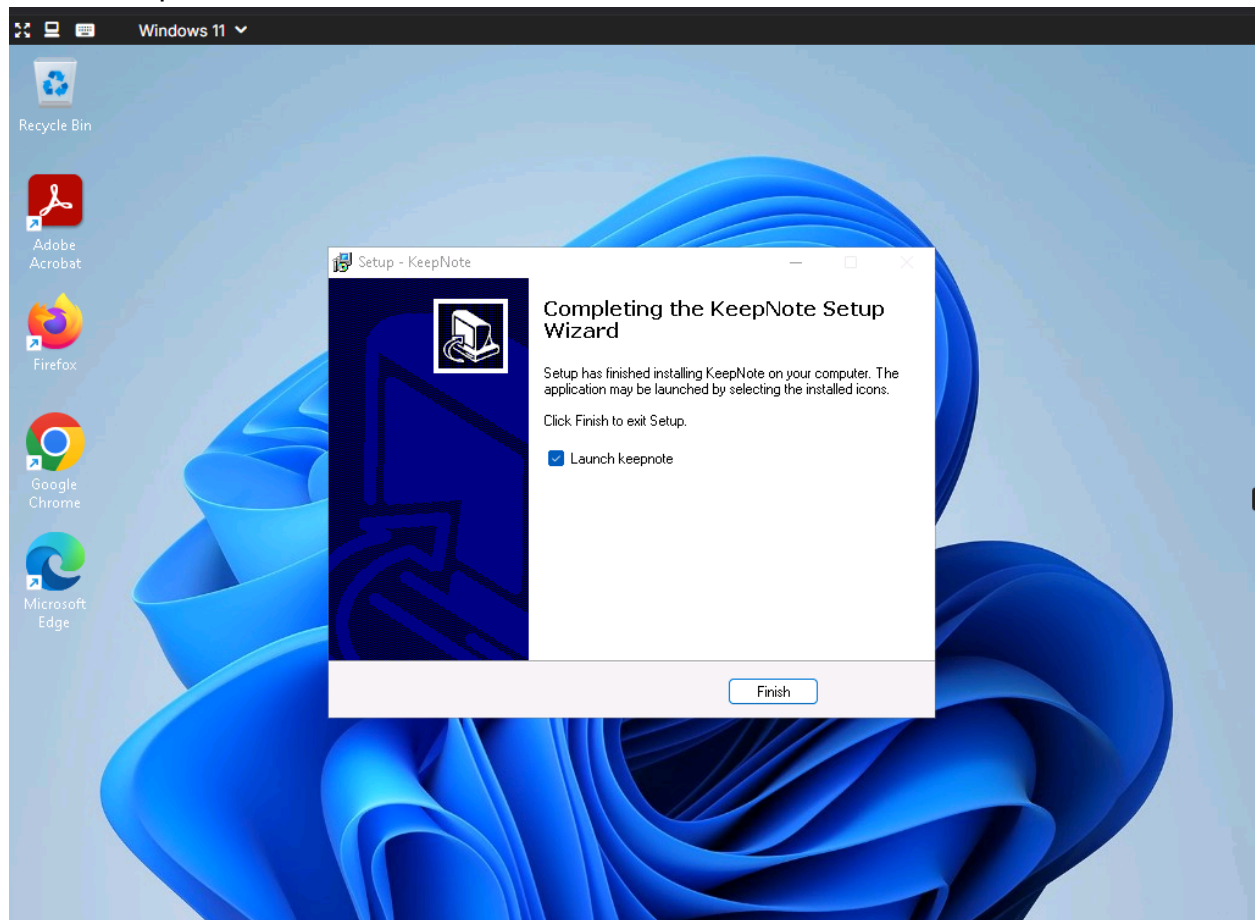

- Generate threat intelligence reports using KeepNote
- Write threat intelligence reports using Microsoft Word

Tasks

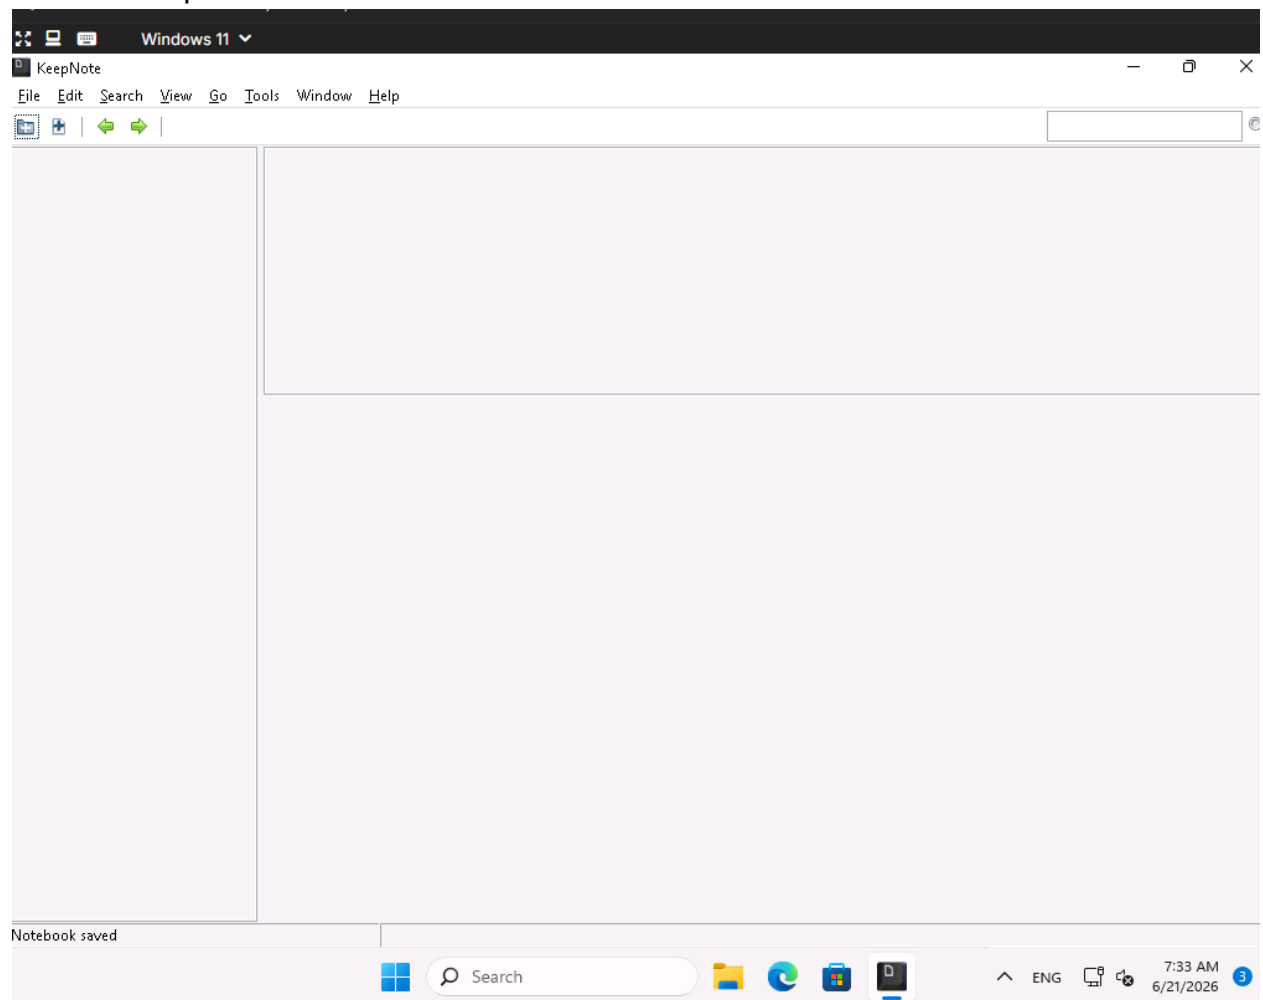

- Launch Windows11

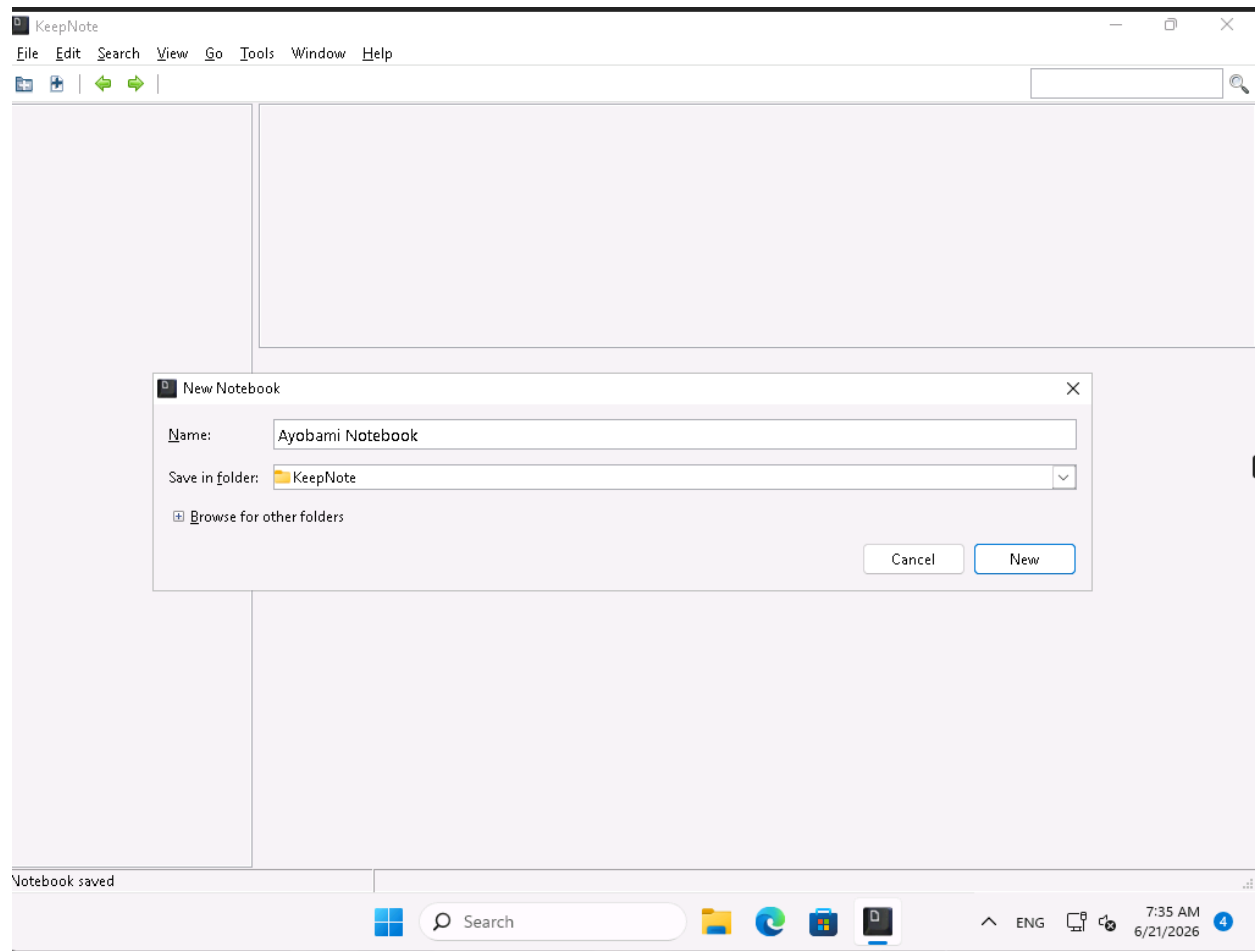

Install KeepNote

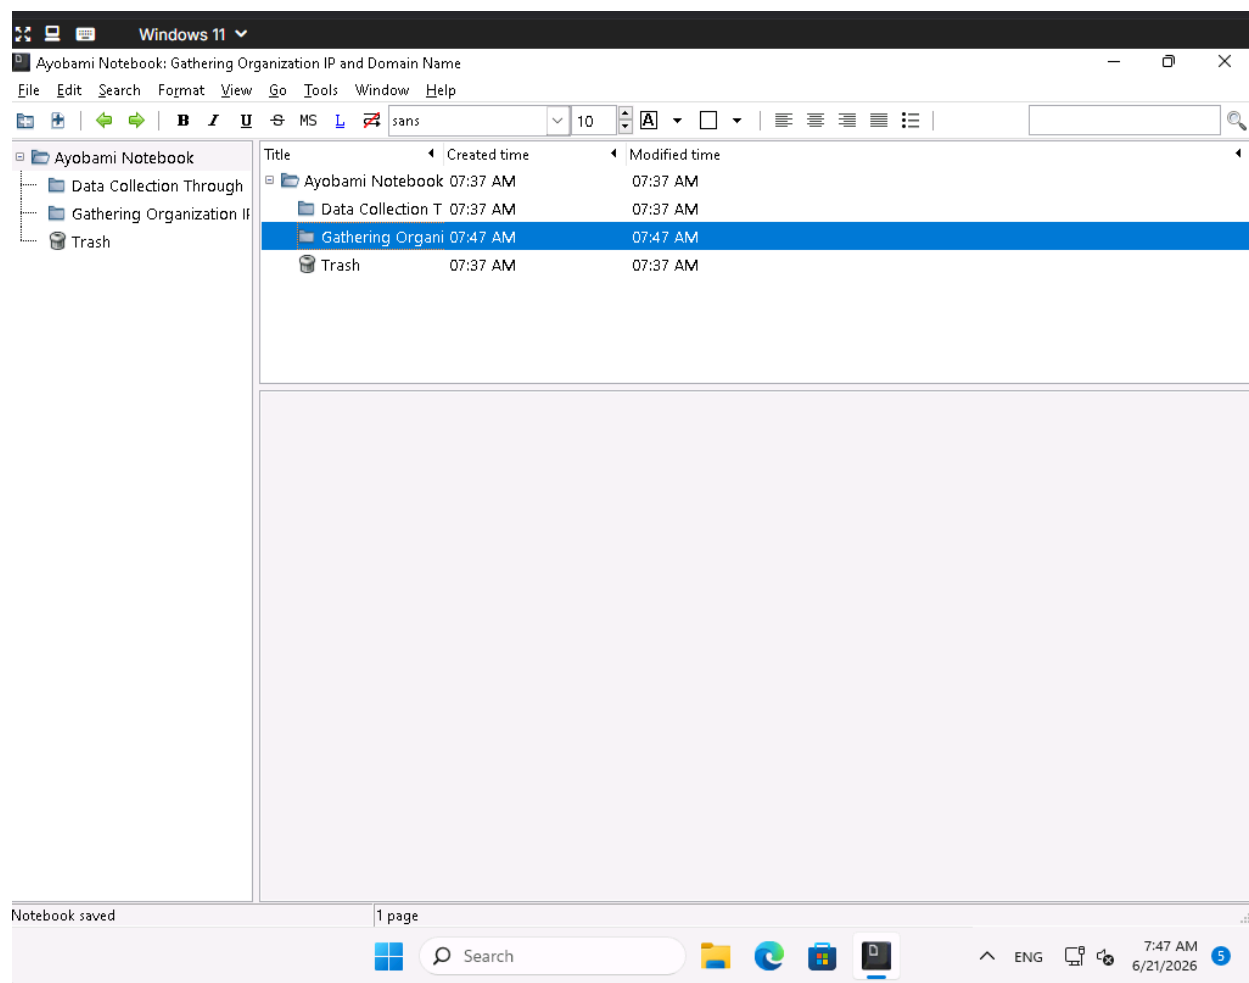

Launch KeepNote

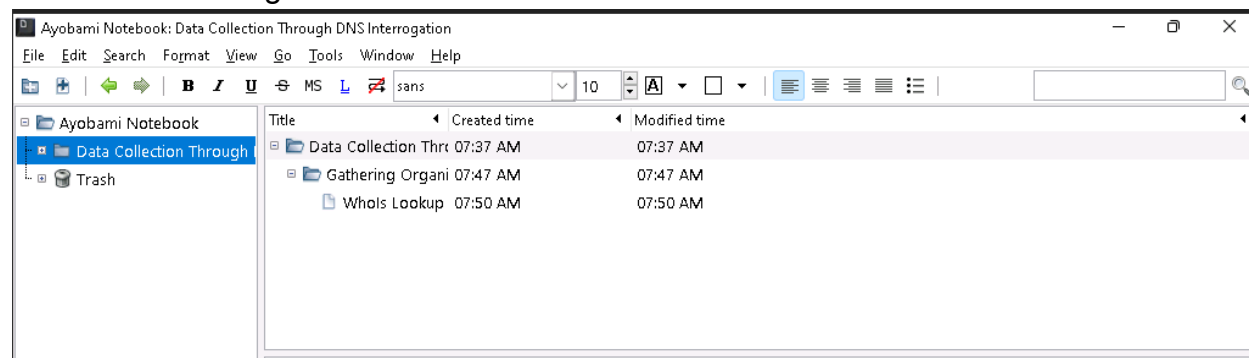

Create a new Notebook

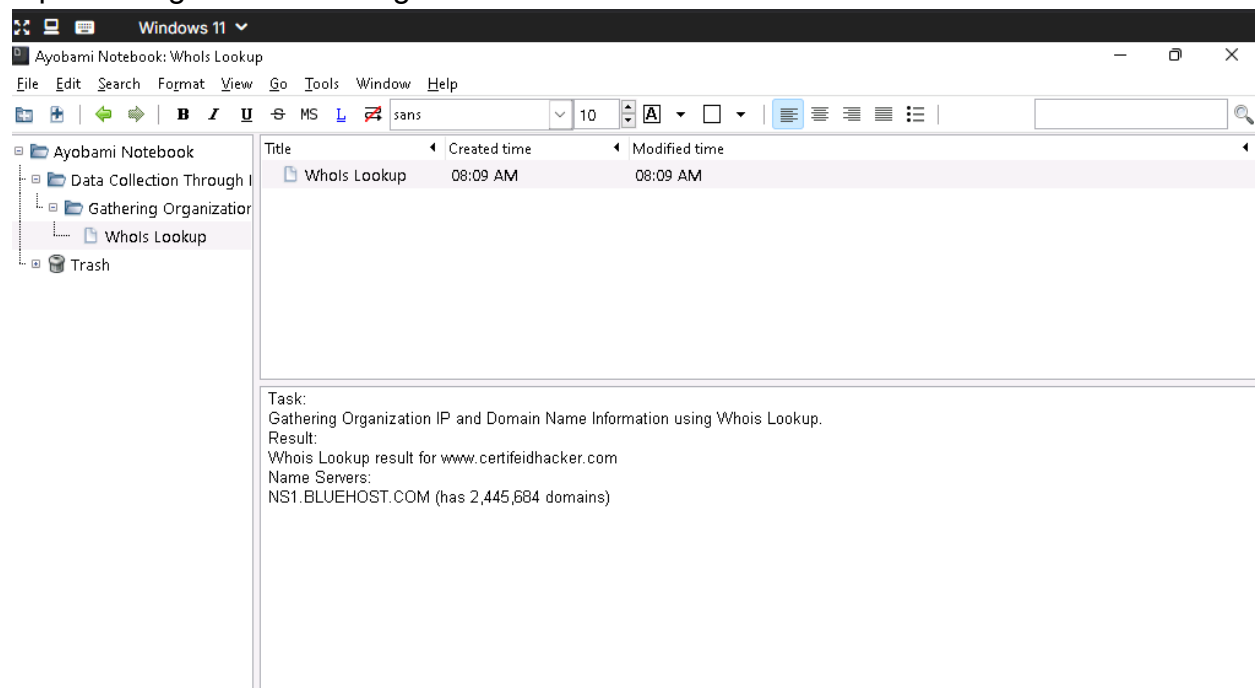

Create a Folders:

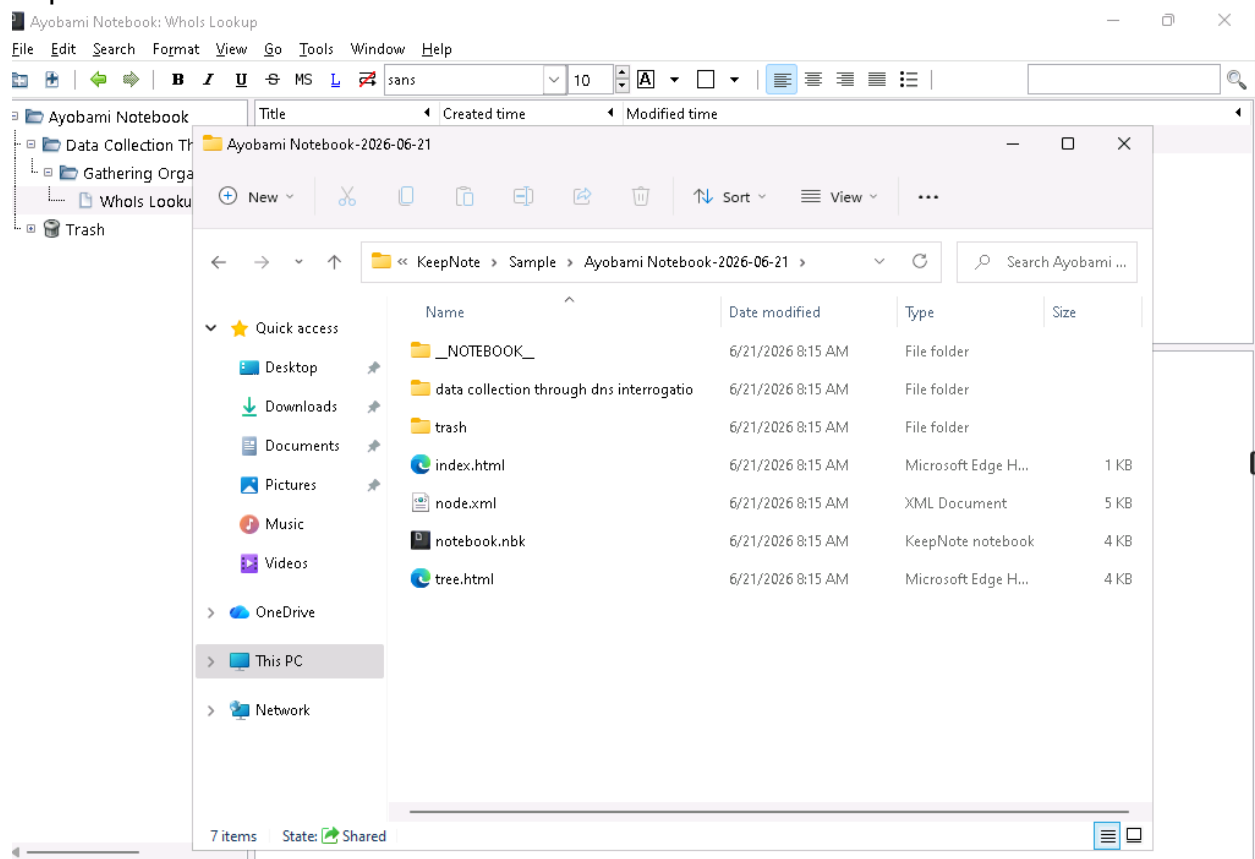

Create a Child Page

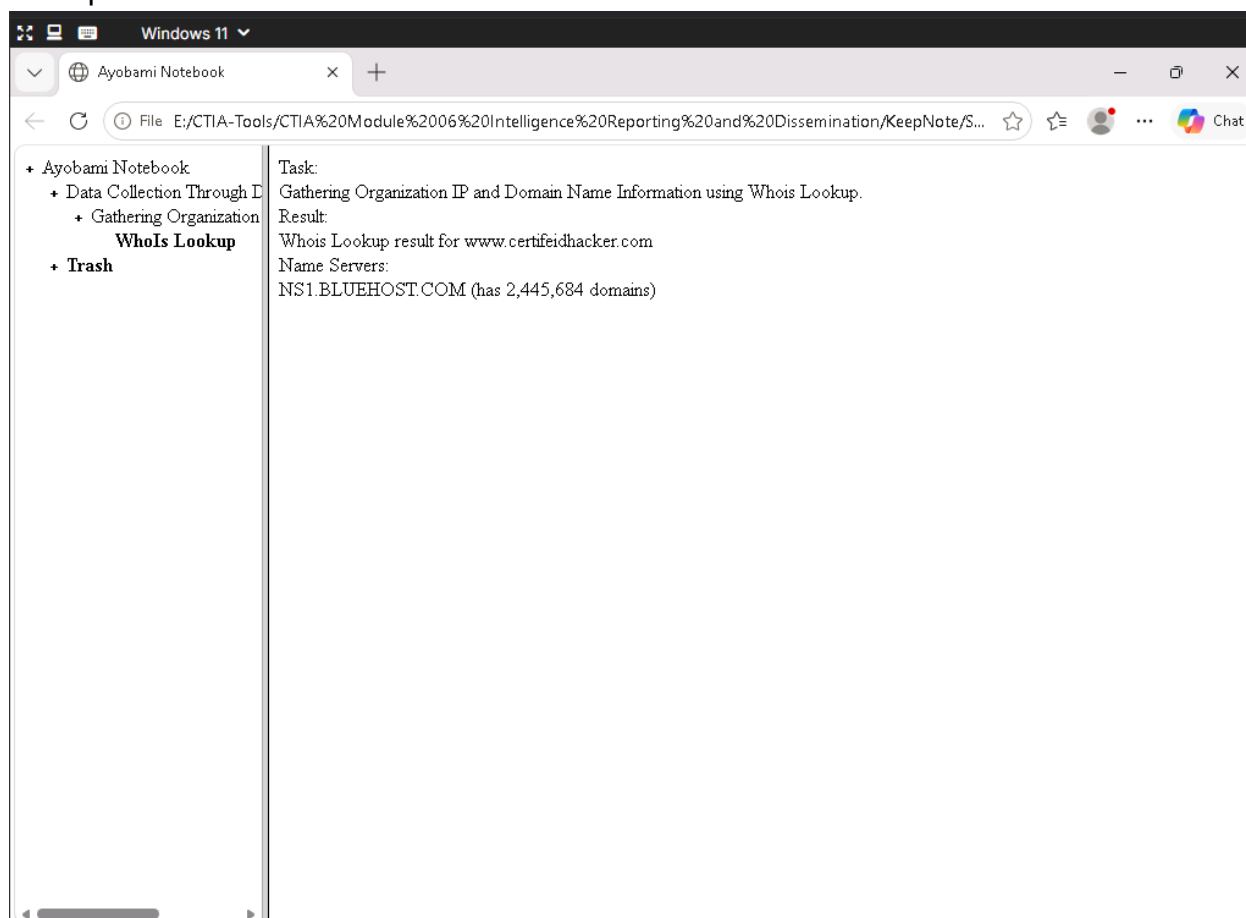

Input findings into Child Page

Exported file

File opened with browser

This concludes the demonstration of threat intelligence report generation using KeepNote.

Exercise 2: Threat Intelligence Sharing

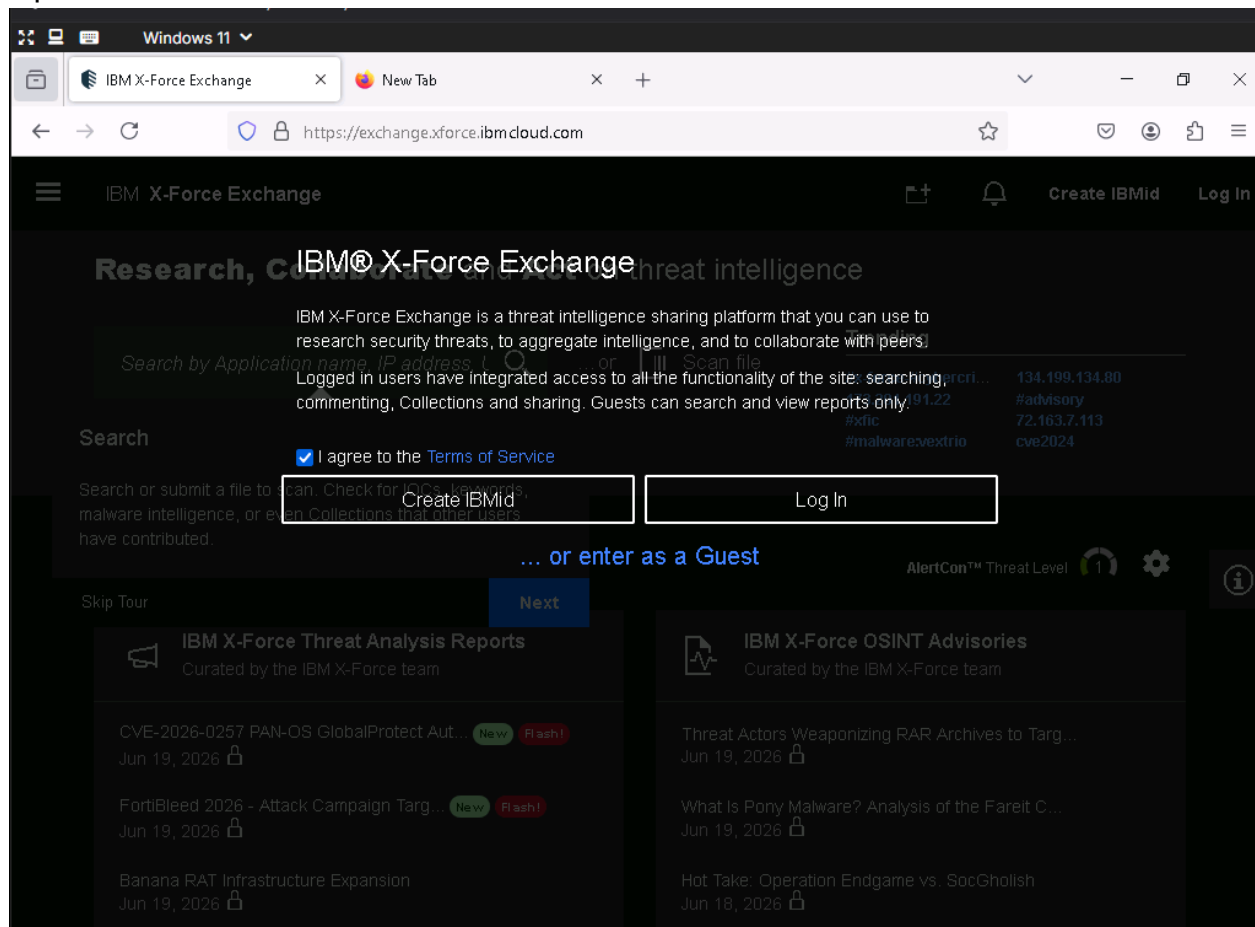

Lab Objectives

The objective of this lab is to help you understand how to do the following:

- Collect data using IBM X-Force Exchange
- Analyze threat data using IBM X-Force Exchange
- Share threat intelligence using IBM X-Force Exchange

TASKS:

Open IBM X-Force

Register

MediaTek Chipset privilege escalation

CVE-2023-32850

 This report does not contain tags. Add tags via the comment box.

Details

mediatek-cve202332850-priv-esc (272991)
reported Dec 4, 2023

MediaTek Chipset could allow a local attacker to gain elevated privileges on the system, caused by an out-of-bounds write in decoder. By sending a specially crafted request, an attacker could exploit this vulnerability to escalate privileges.

CVSS 3.0 Base Score

8.4

Attack Vector	Local
Attack Complexity	Low
Privileges Required	None
User Interaction	None
Scope	Unchanged
Confidentiality Impact	High

Botnet Distribution

The screenshot shows the IBM X-Force Exchange Dashboard. At the top, there's a navigation bar with the IBM X-Force Exchange logo and user icons. Below the navigation bar, there's a section titled "Research, Collaborate and Act on threat intelligence". It features a search bar with the placeholder text "Search by Application name, IP address, L..." and a "Scan file" button. To the right of the search bar, there's a "Trending" section with the following data:

Hashtag	IP Address
#blocklist	192.229.221.95
#ransomware	23.99.81.44

Below the search bar, there's a "Dashboard" section. It features two main cards:

- IBM X-Force Threat Analysis Reports**: Curated by the IBM X-Force team. It lists several reports, including "Hacktivist Groups Threaten to Attack the S..." (Jun 21, 2023), "JanelaRAT Campaign Uses REG Files for ..." (Nov 15, 2023), and "Two for One: Investigation into Stolen..." (Nov 2, 2023).
- IBM X-Force OSINT Advisories**: Curated by the IBM X-Force team. It lists several advisories, including "Sandworm Disrupts Power in Ukraine Using a..." (Nov 9, 2023), "Qlik Sense Exploited in Cactus Ransomware Camp..." (Dec 4, 2023), and "P2Pinfect - New Variant Targets MIPS Devices" (Dec 4, 2023).

At the bottom right of the dashboard, there's a "Cookie Preferences" button.

MD5 Hash Value

The screenshot shows the IBM X-Force Exchange interface for a specific malware report. The URL in the browser is <https://exchange.xforce.ibmcloud.com/malware/f68872773a88652541bd8d6ca9bda058>. The report is titled "X-Force Malware Report" and displays the MD5 hash **f68872773a88652541bd8d6ca9bda058**. A red "Risk High" badge is visible on the left. Action buttons include "Export as STIX 2", "Suggest Edit", and "Follow". A note states: "This report does not contain tags. Add tags via the comment box." Social media sharing icons for Twitter, LinkedIn, Facebook, and RSS are present. The "Details" section lists the following information:

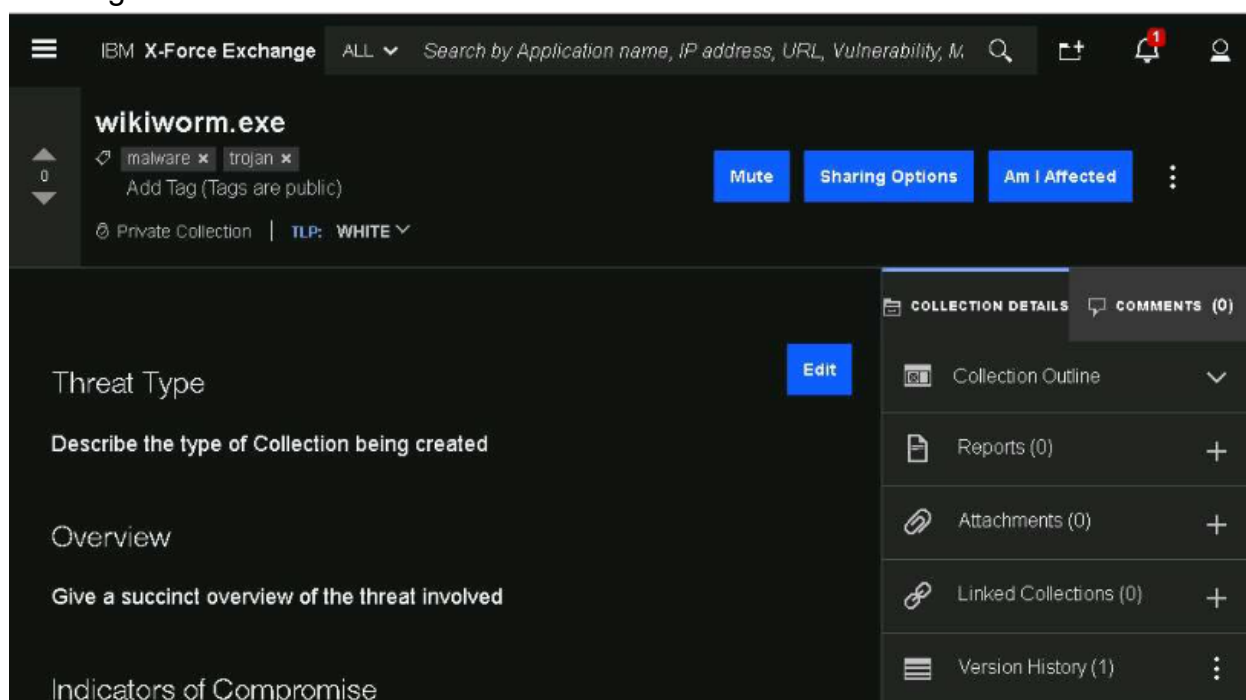

Field	Value
Hash Type	md5
First Seen	May 29, 2011
Last Seen	Apr 27, 2023
Family Name	cobra
Type	Ransomware
Community Coverage	92%
Platform	Win32

A footnote indicates: "* Powered by: ReversingLabs Titanium Platform". On the right, a sidebar shows "All Collections/Reports (1)" with a dropdown menu listing "wikiworm.exe" and "1 MAL". Below this, the author "Sikander Choudhary" is listed. A "Cookie Preferences" button is at the bottom right.

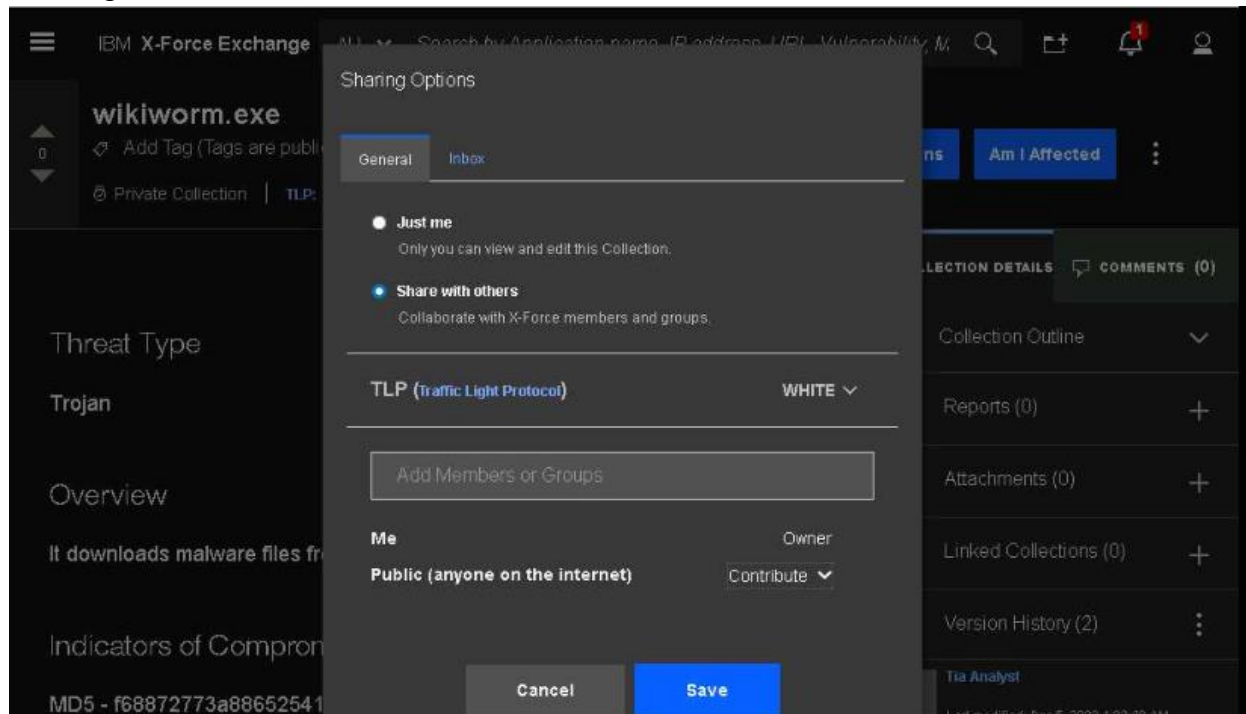

Create New Collection

The screenshot shows the "Collections" page on the IBM X-Force Exchange. The URL is <https://exchange.xforce.ibmcloud.com/collections>. The page header includes the IBM X-Force Exchange logo and a search bar with the text "Search by Application name, IP address, URL, Vulnerability". The main content area is titled "Collections" and shows a summary of collection counts: "My Collections 1", "Collections shared with me 0", "Public Collections 7859", and "Recommended 6". A search bar labeled "Filter by Title or Author" and a "Newest" dropdown menu are provided. Below the summary, there is a dashed box labeled "+ New Collection" and a preview of a collection named "wikiworm.exe" by "Tia Analyst".

Add Tag field to new collection

Sharing

This concludes the demonstration of threat intelligence sharing with IBM X-Force Exchange
